SAMwin 4.5.0.23 Release Notes

Current Release

The following issues have been corrected since the last release (4.5.0.22):

Severity	Component	Issue	Problem Description
Major	SAMwin.CBC	337330	On CUCM systems, a codec renegotiation is not properly handled for calls traversing further trunks. This results in silent audio connections. A new gateway flag (Set inactive before renegotiation) has been introduced to work around this issue.
Major	SAMwin.CBC		When using the Zylinc Outlook integration, the start and end times of appointments have not been recalculated regarding the local time settings. The times were shown in UTC.
Enhancement	SAMwin.CBC		It is now possible to send an email to the entire organizational unit of a subscriber. (SAMwin uses the email address configured for the organizational unit. If this address is not configured, all addresses of the subscribers are added as receiver.)
Enhancement	SAMwin.CBC		It is now possible to switch to full text search automatically on incoming calls (This feature has to be enabled via the configuration)
Enhancement	SAMwin.CBC		When deleting absence notes you will now be asked if you also want to delete absence notes of other subscribers having the same note configured.

Previous Releases

The following issues have been corrected between 4.5.0.21 and 4.5.0.22:

Severity	Component	Issue	Problem Description
Major	SAMwin.CAS		Deletion of Calls outside of Storage-Deep doesn't work always (Database-Timeout)
Major	SAMwin.CBCNDS	<u>425366</u>	Change Delete-Permission of Extensions to "can edit Extension-Number"
Major	SAMwin.CAS	<u>273417</u>	Name not changed on Checkout for Nortel Meridian
Major	SAMwin.CAS	<u>126321</u>	Read Wakeup-List doesn't work on CS1000
Major	SAMwin.CAS	<u>743586</u>	Prevent infinity retry for FTP-Connect If FTP-Server is not available
Major	SAMwin.CAS	<u>356328</u>	Add Fallback to last Ticket-Version if single- line Ticket is read
Major	SAMwin.CBCNDS	<u>532533</u>	Add Mobil-Field as searchable field and allow call of it via shortcut

Major	SAMwin.CBCNDS		Not possible to dial via shortcut from a optional-field
Minor	SAMwin.CAS		Change BusinessPhone Access Code for outgoing Calls
Minor	SAMwin.CAS	<u>423610</u>	Wakeup-Calls are not deleted on Checkout
Minor	SAMwin.Manager	<u>853783</u>	Prevent close of Extensions- / Organization- Window when pressing ESC

The following issues have been corrected between 4.5.0.12 and 4.5.0.13:

Severity	Component	Issue	Problem Description
Minor	SAMwin.CBC Client		The client sometimes crashes when using "Logon as" functionality or applying changes of the user configuration.
Minor	SAMwin.CBC Client		Key configurations are not correctly imported from previously stored *.cbc-file. (Some key configurations are missing; empty lines are shown in key configuration grid)
Enhancement	SAMwin.CBC Client		Improved search functionality. If a search criterion is changed, the current value of the selected internal extension is used as initial search criteria. (This behavior has to be enabled using the user-configuration)

The following issues have been corrected between 4.5.0.11 and 4.5.0.12:

Severity	Component	Issue	Problem Description
Major	SAMwin.CBC Server		Microsoft Office Communicator fails to put SAMwin calls on-hold.
			On-hold attributes in SDP offers are generally not honored. This fix might also apply to other systems where on-hold of operator calls is not working correctly.

The following issues have been corrected between 4.5.0.10 and 4.5.0.11:

Severity	Component	Issue	Problem Description
Major	SAMwin.CBC Server		The SIP response 491 Request Pending is not correctly handled. This may result in defunct outbound calls on some systems.
Major	SAMwin.CBC Server		In some cases, it is not possible to connect SAMwin and Nortel CS1000 R5.5 systems with a SIP proxy server (SPS).
Minor	SAMwin.CBC Server	<u>692405</u>	CLID of calls with withheld number is sometimes wrong after call falls back to operator after a transfer try.
Minor	SAMwin.CBC Server	<u>442851</u>	RTP connection trace in SAMwin Manager sometimes does not properly clear dead connections.

The following issues have been corrected between 4.5.0.9 and 4.5.0.10:

Severity	Component	Issue	Problem Description
Major	SAMwin.CBC		In some scenarios (e.g. SAMwin call is being transferred in CS1k environment to a voicemail system) codec negotiation fails and there is no voice connection.
Major	SAMwin.CBC		No SVM data queue durations are being written.
Minor	SAMwin.CBC Client		It is not possible to switch to search fields of organizational units via short cut in the internal directory.

The following issues have been corrected between 4.5.0.8 and 4.5.0.9:
